Stacs HACK

20-21 February 2016
St Andrews, Scotland

Sponsorship Options

STACS

What is StacsHack?

StacsHack is an award-winning*, student-organised programming competition held at the University of St Andrews, where students with a keen interest in problem solving and technology work in teams to learn, build and share awesome projects developed in just 24 hours.

Last year, StacsHack saw over 100 students from as far away as Aberdeen, Edinburgh and Manchester; great local food and fun mini-events - all of which was made possible with the support of our incredible sponsors. This year we plan to go bigger and better with at least 130 students, and we invite you to work with us to deliver a fantastic weekend to Britain's brightest and most creative student makers.

* StacsHack 2015 received the runner-up award for best student society event of 2015, awarded by the University of St Andrews Students' Association

Why should you sponsor?

Do you have a technology our hackers will love?

Becoming a sponsor will provide a great opportunity to expose our hackers to your technology or dataset, gaining not only interesting new uses of it, but critical feedback that you can use as part of your lifecycle process.

Are you looking to recruit the country's brightest minds?

Whether you want to test creativity, problem solving or analysis, hackathons attract some of the most talented and engaged computer scientists in the country. Show off what your company do and have meaningful conversations with techies.

What other benefits can StacsHack provide?

- Increase your brand awareness and positive brand association easily and affordably.
- Crowdsource your Research & Development, and potential engage with teams who have great ideas post-event.
- Gain visibility beyond StacsHack, and to the wider EU hackathon community.

Major League Hacking Member

Major League Hacking (MLH) is the official student hackathon league. Each term, more than 50,000+ developers, designers, and makers collaborate at the 150+ official MLH hackathons in the USA, Canada, Mexico and Europe. As a member of this community, our event will get much wider exposure to students around Europe, and across the world.

Previous sponsors:

Our 2015 sponsors helped us throw our first inter-university hackathon, and shape a great student developer community at the University of St Andrews and beyond*.

* StacsHack inspired a wave of Scottish hackathons held in Dundee, Stirling and Aberdeen
